<p>Proposal Subject</p>	<p>Ineffective Model Ordinance Requirement</p>
<p>Specific NSSP Guide Reference</p>	<p>Section II. Model Ordinance Chapter XV. Depuration</p>
<p>Text of Proposal/ Requested Action</p>	<p>.01 Critical Control Points</p> <p>A. Receiving Critical Control Point - Critical Limits.</p> <p>(1) The dealer shall receive and depurate only shellstock which is obtained from a licensed harvester who has:</p> <p>(a) Harvested the shellstock from an Approved or Conditionally Approved area in the open status as indicated by the tag; [C] and</p> <p>(b) Identified the shellstock with a tag on each container or transaction record on each bulk shipment; [C] and</p> <p>(c) Harvested the shellstock in compliance with the time/temperature requirements of Chapter VIII. @.02 A. (1), (2) or (3) as determined from records supplied by the harvester described in Chapter VIII. .02 G. (2) [C];</p> <p>(2) The dealer shall receive and depurate only shellstock obtained and transported from a dealer who has:</p> <p>(a) Identified the shellstock with a tag on each container as outlined in Chapter X. .05 or transaction record with each bulk shipment as outlined in Chapter VIII. .02 F. (8); [C] and</p> <p>(b) Provided documentation as required in Chapter IX. .04 and .05; and [C]</p> <p>(c) Adequately iced the shellstock, or [C]</p> <p>(d) Shipped the shellstock in a conveyance maintained at or below 45° F (7.2° C) ambient air temperature; or [C]</p> <p>(e) Cooled the shellstock to an internal temperature of 50° F (10° C) or less. [C]</p> <p>(3) Should a dealer receive shellstock from a dealer who is shipping shellstock harvested in accordance with Chapter VIII. @.02 A. (3) or restricted use shellstock that has not been cooled to an internal temperature of 50° F (10° C), the shellstock must be accompanied with a time/temperature recording device indicating that continuing cooling has occurred. This product can be received without meeting the receiving requirements of Chapter XIII. .01 A. (2) (e), (d) or (e). Shipments of four (4) hours or less will not be required to have a time/temperature device. [C]</p> <p>(4) The dealer shall receive and depurate only shellstock obtained</p>

	<p>from a special licensed harvester who has:</p> <ul style="list-style-type: none"> (1a) Harvested or supervised the harvest of shellstock from a Restricted or Conditionally Restricted area in the open status; [C] and (2b) Identified the shellstock by transaction records which include the harvest area, the special-licensed harvester's name, harvester license number(s), the harvest date, and the amount of shellstock shipped in each lot. [C]
<p>Public Health Significance</p>	<p>This practice should not be permitted under the NSSP since product from approved or conditionally approved waters (in the open status) can be harvested and sold without depuration. Permitting this practice suggests that the growing area classification section of the NSSP is not adequate.</p>
<p>Cost Information</p>
