Shellfish-Related *Vibrio vulnificus* Cases/Deaths, 2013

NOTE: Cases involving self-harvest (recreational) are not counted towards the reduction goals.

NOTE: Cases involving consumption of clams only are not counted towards the reduction goals.

NOTE: Only cases related to commercially harvested oysters are included in these totals.

NOTE: Core State totals are no longer relevant in determining illness reduction goals; and thus are not included this year.

NOTE: All commercial oyster consumption cases are reviewed by the ISSC to decide if they should count based on criteria set by the ISSC; this table contains all cases reported to CDC and FDA
